PROFESSIONAL SUMMARY

Frontend / CMS Developer with 3+ years of experience building production WordPress and AEM websites. Strong in Figma-to-code implementation, custom WordPress themes, ACF-based content systems, AEM components, API integrations, and frontend performance optimization. Delivered 5 live WordPress sites for yacht charter and real estate clients, including booking and listing workflows powered by third-party APIs.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), jQuery, React.js, responsive design, mobile-first development

WordPress: Custom themes, Advanced Custom Fields (ACF Pro), Elementor, WooCommerce, WP Engine, performance optimization

Adobe Experience Manager: AEM components, templates, dialogs, workflows, HTL / Sightly, Sling Models, OSGi, CRXDE, JCR

Backend / Integrations: PHP, Laravel, Java, REST API integrations, live data feeds, Groovy scripts, booking and listing workflows

Tools: Git, GitHub, Jira, Azure DevOps, Figma, Photoshop, FileZilla / SFTP, WP Engine, HostArmada, SiteGround

AI-assisted development: Claude, ChatGPT, Codex, Gemini for debugging, code review, documentation, and faster implementation

WORK EXPERIENCE

Frontend WordPress Developer

Ankor / Ingnius | Oct 2025 - Present

- Delivered 5 production WordPress websites end-to-end for yacht charter and real estate clients, from Figma design handoff through live deployment.
- Built Split Yacht Charter as a WooCommerce-based booking platform integrated with the NAUSYS API, covering real-time availability, dynamic pricing, yacht listings, and booking workflows.
- Integrated third-party APIs and live data feeds for EJ Yachts and Iman Real Estate, enabling dynamic property and vessel listings with less manual content work.
- Built editor-friendly ACF Pro content structures and optimized frontend performance through lazy loading, minification, and semantic markup.
- Managed staging and production deployments across WP Engine, HostArmada, and SiteGround while reviewing PRs for responsive, performance-focused delivery.

Webmaster & AEM Developer (Full-Stack)

Evolve | Jul 2023 - Oct 2025

- Designed and built custom AEM components, templates, workflows, and dialogs from scratch for enterprise-scale content requirements.
- Developed Sling Models, servlets, and OSGi services in Java to support dynamic content delivery and reduce hardcoded frontend dependencies.
- Led website migration work into Adobe Experience Manager, managing JCR content structures and maintaining data integrity during transitions.
- Authored Groovy scripts for debugging, environment configuration, and data migration tasks, reducing manual release and troubleshooting effort.
- Implemented Adobe Target for personalization and A/B testing while contributing to Agile sprint planning, bi-weekly deployments, and code reviews.
- Recognized as Best Performer of 2024 within the development team.

Frontend Web Developer (WordPress)

Taocrowd | Aug 2022 - May 2023

- Converted PSD and Figma designs into fully responsive, cross-browser-compatible WordPress websites using custom themes.
- Optimized frontend code and imagery for faster page loads, stronger Lighthouse scores, and better visual quality across client projects.
- Maintained multiple client websites simultaneously while preserving brand consistency and design accuracy across deliverables.

SELECTED PRODUCTION PROJECTS

- [Polaris Yacht Charter](#) - WordPress yacht charter site delivered from Figma to production.
- [Mint Charter](#) - WordPress yacht charter site with responsive frontend implementation.
- [Split Yacht Charter](#) - Booking platform integrated with NAUSYS API for availability, pricing, yacht listings, and booking workflows.
- [EJ Yachts](#) - Dynamic yacht listing website using third-party data integrations.
- [Iman Real Estate](#) - Real estate listing website with live data feeds and editor-friendly content management.
