

John Ralph Yambao

Frontend Web Developer · AEM Developer · WordPress Developer

 johnralph266@gmail.com  0956-885-8581  Santa Rosa, Laguna, PH

PROFILE

Frontend developer with 3+ years of experience building responsive, performant websites using WordPress and Adobe Experience Manager (AEM). Skilled in the full component lifecycle — from Figma conversion and custom theme development to API integrations, AEM backend services, and cross-browser debugging. Comfortable working independently in Agile teams and using AI-assisted tooling to ship quality work faster.

TECHNICAL SKILLS

Frontend	HTML · CSS / SCSS · JavaScript · jQuery · React.js · Bootstrap · Tailwind CSS
CMS & Platforms	WordPress · Elementor · WooCommerce · Adobe Experience Manager (AEM) · Adobe Target
AEM / Backend	Java · PHP · Sling Models · HTL / Sightly · OSGi · CRXDE · Groovy Script · JCR
Tools	Git · GitHub · Jira · Azure DevOps · Photoshop · Figma · WP Engine · FileZilla · SFTP
AI Tooling	Claude · ChatGPT · Codex · Gemini

OTHER SKILLS

- Strong understanding of responsive web design principles.
- Knowledge of cross-browser compatibility and debugging techniques.
- Ability to optimise web performance and improve page load times.
- Excellent attention to detail and ability to follow design specifications accurately.
- Quick to grasp new concepts and technologies; able to work independently with minimal supervision.

WORK EXPERIENCE

Frontend WordPress Developer · Ankor IO / Ingnius

Oct 2025 – Present

Yacht charter & real estate · Primary hosting: WP Engine

Live projects: polarisyachtcharter.com · mintcharter.com · splityachtcharter.com · eiyachts.com · imanrealestate.com

- Converted Figma designs into fully responsive, production-ready WordPress websites for yacht charter and real estate clients.
- Built Split Yacht Charter — a booking platform integrated with the NAUSYS API, covering yacht listings, real-time availability, dynamic pricing, and end-to-end booking workflows, with WooCommerce handling the payment system.
- Implemented company APIs and dynamic data feeds for EJ Yachts and Iman Real Estate.
- Used Advanced Custom Fields (ACF Pro) to build flexible, easily editable content structures, allowing clients to manage dynamic page content without touching code.
- Managed client site migrations using FileZilla and SFTP for direct server access, quickly adapting to each client's existing hosting environment and CMS setup regardless of the platform.
- Conducted GitHub PR reviews to enforce code quality, responsiveness, and team development standards.

- Handled staging environments, deployments across WP Engine, HostArmada, and SiteGround, debugging, and ongoing client updates.
- Consistently achieved 85+ performance scores on Google PageSpeed Insights through image optimisation, lazy loading, caching strategies, and clean frontend code.
- Used AI coding tools (Codex, Claude, Gemini, ChatGPT) to accelerate development while maintaining quality standards.

Webmaster & AEM Developer (Full-Stack) · Evoke

Jul 2023 – Oct 2025

Adobe Experience Manager · Java · HTL · Sling Models · Adobe Target

- Designed and built custom AEM components, templates, workflows, and dialogs from scratch to support editorial and business requirements.
- Developed Sling Models, servlets, and OSGi services in Java to power dynamic content delivery.
- Spearheaded migration of existing websites onto Adobe Experience Manager, managing JCR content structures throughout the transition.
- Wrote Groovy scripts for debugging, environment configuration, and data migrations — reducing downtime and accelerating delivery.
- Implemented Adobe Target for audience-based personalisation and A/B testing.
- Worked within Agile sprint cycles using Jira and Azure DevOps; participated in bi-weekly deploys and sprint planning.
- Recognised as Best Performer of 2024 within the development team.

Frontend Web Developer (WordPress) · Taocrowd

Aug 2022 – May 2023

WordPress · Custom Themes · PSD/Figma conversion

- Converted PSD and Figma designs into responsive WordPress websites using custom themes.
- Optimised frontend code for performance, cross-browser compatibility, and fast load times.
- Set up and maintained multiple client websites, ensuring brand consistency and design accuracy.
- Used Photoshop to process and optimise images for web delivery.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Engineering

2018 – 2020

Malayan Colleges of Laguna

Full-Stack Web Development Bootcamp

May – Aug 2022

KodeGo · Certificate of Completion · 2× Best in Project Award
